PUBLIC PETITION FOR NURSE UNITY

NURSE ALLIANCE
1199SEIU United Healthcare Workers East

To the Officers of the New York State Nurses Association (NYSNA) and the California Nurses Association (CNA):

We urge you to come to an agreement, offered by SEIU members on multiple occasions, to focus on helping RNs who need a union voice, rather than wasting precious resources on causing further disunity. At a time when there are over 2 million nurses without a union, when there is an intense nurse shortage and when 47 million Americans are uninsured, nurse unions should not be interfering in each other's membership or undermining efforts to unite non-union RNs. We should all be moving forward together to protect our patients, advance our profession and achieve affordable healthcare for all.
