F	Procedures	

It is recognized that RN's & LPN's may voluntarily obtain competencies outside their listed float areas. It is understood that once those voluntary competencies are attained, the employee would be utilized to float to that area after employees within the Primary and Secondary grouping are utilized, if applicable. The employee should maintain an annual competency to float or pick up extra shifts outside of their primary and secondary float grouping.

The Dialysis, Infection Prevention, Youth Link, and Patient Management are closed units that would not receive floats. Other departments not listed provide special/unique services.

Additionally, employees may voluntarily float to areas that they are competent.
